Print from Own Laptop to Inceptus Multi-Function Printer (MFP)

BYOD software allows staff and students to use their personal devices (laptops) to send print jobs to Multi-Function Printers. The student can avoid having to queue for UNAM-provisioned devices.

Requirements

- The personal device must be connected to UNAM WiFi first before any attempts
- The student need to install a piece of software called "**PDAgent**" onto their device.
- The student must have a registered account to access the UNAM Printing Portal <u>https://printing.unam.na</u> **Register today!**
- The software can be downloaded from the printing portal <u>https://printing.unam.na/</u>
- Install print queues from the print server \\192.168.152.21

INSTRUCTIONS TO SETUP PRINTING FROM OWN DEVICE

- 1. **Connect to UNAM WiFi** UNAM Students: confirm access to network resources. One of the quick ways to test this would be to check access to any of public sites such as <u>https://www.google.fr</u>
- 2. **Register an account on the UNAM printing portal** navigate to <u>https://printing.unam.na/</u> and click on [**Register Account**] as per graphic below. If you already have an account, proceed to step 3 below.

VILVERSITY OF NAMIBIA Welcome back, Please sign in to your account below.

UNAM COUNT CONTRACTOR ACCOUNT	Account Settings
☆ > Dashboard	

4. Scroll to the bottom of the screen and click on "Guest BYOD Printing Software" https://printing.unam.na/downloads/PDAgentInstaller.msi

5. Once download is complete, check downloads folder for "**PDAgentInstaller.msi**". Run "**PDAgentInstaller.msi**" to install the software on your device. Administrator privileges may

be required to complete the installation. Install the PDAgent Software by selecting the presented default settings.

- 6. Once installation is complete, run the "**PDAgentClient**" app. Type "PDAgent" in the Windows search box to locate the app.
- 7. Login with your Portal credentials, but specifying the username as per graphic below. i.e. students\<<students\<<students
